4. Use {**TYPE OF STYLE**}
5. Use only {**TYPE OF SOURCES**}
6. For things like {**e.g: Names**} input only the word {**Var: Name**}
7. Don't be {**adjective**}
8. Give result only in the format of {**FORMAT, e.g: plain text**}

# Tips

## TIPS

1. Define clear objectives.
2. Assigning a role is very important to get the most out of ChatGPT.
3. Try to set restrictions and what to avoid always.
4. Give as many details as you can but always try to keep them organized.
5. Examples are a good way to give ChatGPT an idea of how his answer should be.
6. Plugins & Addons add more features, use that to your advantage.

Software troubleshooting

## 1. Rename your chats

try to use each one for a specific task or purpose, starting a new thread if you want to discuss or work on a different project.

## 2. Set a custom instruction

The screenshot shows the 'Customize ChatGPT' interface. At the top, it says 'Customize ChatGPT'. Below that, there's a section titled 'Custom Instructions' with a question mark icon. The main prompt is 'What would you like ChatGPT to know about you to provide better responses?'. There is a large text input area for the user's response. At the bottom left of the input area, it says '0/1500'. At the bottom right, there is a 'Hide tips' link. To the right of the input area, there is a 'Thought starters' section with a list of bullet points: 'Where are you based?', 'What do you do for work?', 'What are your hobbies and interests?', 'What subjects can you talk about for hours?', and 'What are some goals you have?'.

Customize ChatGPT

Custom Instructions ?

What would you like ChatGPT to know about you to provide better responses?

0/1500

Hide tips

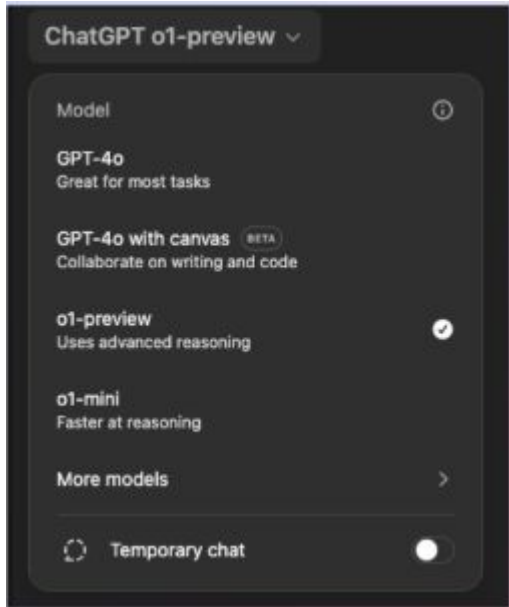

Thought starters

- Where are you based?
- What do you do for work?
- What are your hobbies and interests?
- What subjects can you talk about for hours?
- What are some goals you have?

What would you like ChatGPT to know about you to provide better responses? and

How would you like ChatGPT to respond?

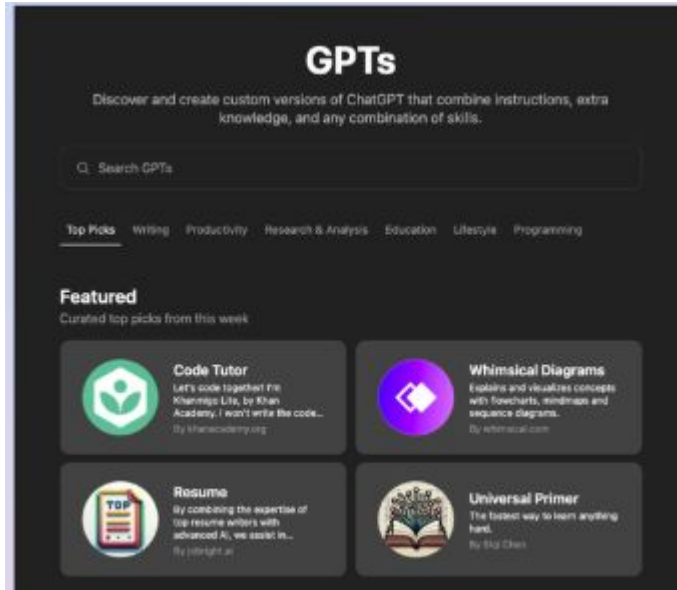

### 3. Pick the right model

a large research or homework project and you need to plan it out — use o1-preview

## 4. Make use of GPTs

Canva GPT that lets you use natural language to design logos, social media images and presentations.
